

Organic Chemistry – Monday Colloquium WS2023/24:

(Location: Hörsaal Chemie, Time: 17:15)

16th October 2023

Amir Hoveyda – University of Strasbourg

Development of Catalytic and Orthogonal Click Processes

Different location: Hörsaal Anatomie, Albertstraße 17

23rd October 2023

Kazushi Mashima – University of Osaka

Organosilicon compounds as unique salt-free reducing reagents of metal compounds, generating catalytically active species

27th November 2023

Pierre Stallforth – University of Jena & Leibniz HKI

Natural Products from Interacting Microorganisms and Ancient Microbiomes

28th November 2023 (GDCh)

Stefanie Dehnen – Karlsruhe Institute of Technology

Multinary Cluster Compounds: From Molecular Aesthetics to Macroscopic Functionality

4th December 2023 (GDCh)

Peter Schreiner – University of Gießen

London Dispersion in Molecular Chemistry

11th December 2023

Urs Gellrich – University of Gießen

Novel metal-free systems for bond activation and catalysis: A computational and synthetic study

15th January 2024 (GDCh)

Reinhard Brückner – University of Freiburg

Neue Methoden zur Darstellung von Benzotropolon und Pulvinonen.

Totalsynthese des Benzotropolon/Bis(pulvinon)-Naturstoffs Aurantricholon

22nd January 2024

Helma Wennemers – ETH Zürich

Peptides – Molecular Alrounders

29th January 2024

Burkhard König – University of Regensburg

Better organic synthesis with light!

05th February 2024

Ruth Gschwind – University of Regensburg

NMR in Organo- and Photocatalysis – Pushing the Limits
